

“SNAP, CRACKLE AND POP- WHY DOES MY SHOULDER HURT ME SO?”

This community education seminar is developed especially for those seeking solutions to issues of the shoulder. The shoulder is one of the most mobile and problematic joints of the body, and common symptoms of shoulder problems include pain, weakness and loss of motion that can interfere with activities of daily living, work, and recreation. An experienced shoulder specialist, Dr. John Todd will discuss common causes and the latest options available – including non-operative and operative care.

**JOHN L. TODD, MD,
MEDICAL DIRECTOR**
THE SHOULDER CENTER AT BALDWIN
